

<http://www.wireie.com/>

WireIE is an industry leader that delivers high availability; secure data over networks in rural and remote regions. We specialize in owning and operating Ethernet Networks for the carrier, oil and gas, utilities, healthcare and government industries.

WireIE has assembled a team of specialists with proven experience in designing, building, and managing state-of-the-art Networks. Their Expertise is in providing carrier grade bandwidth and reliability to under-served and inaccessible enterprises in remote, rural, or previously under-served enterprise locations. WireIE has carrier relationships that enable it to provide services to their end customers in industries including Energy, Mining, Healthcare, Financial and Public Sector.

Covington first invested in Wire IE in 2008 and has invested in excess of \$37 million into the Company since that time and maintains a significant voting interest in the Company.
